INTRODUCTION

Become a Superhero/Investor with SuperH[olders] that saves the world while getting rich!

Together with our community we'll help SuperH become THE charity coin, while still being a great investment on both short and long term.

Abstract

1. What is SuperH?

A bep20 token with a project aiming to deliver holders great profits while helping charity institutions.

2. What has SuperH been planning?

We're building a social network with charity as its main focus, where investors and normal users will be able to address various social issues and donate to the charity they most see fit.

3. How will you actually help charities?

Initially, once every 15 days we'll create a poll on our website listing various charities and we'll allocate the donation to the most voted charity institution. After that, a portal will be available that will function as a social network.

Why invest in SuperH

A big family

Before launching our token we arranged a remarkable Staff (made of over 100 people including internal staff, designers, devs, mods and many, many other talented individuals) ready to spread it out and help it grow.

Holders Rewards

20% of all tokens will be redistributed to everyone who keeps the token without selling it. We will release the Tokens in increasing percentages in certain time frames. This feature is unique. Not selling will bring a great economic advantages to the Holders.

Community Benefits

Clear tokenomics and fair contract, for the benefit of the community

Liquidity 100% guaranteed for 99 years

Liquidity is 100% guaranteed, the owners of the token cannot touch it for 99 years, all certified on Unicrypt.

Potential x500

Token created with a very big potential to GROW (don't be too surprised when we'll get to that x500)

No Dump, Antiwhale

SuperH Token has been created to prevent big dumps and contrast the whale's attempts to manipulate the price

What is our target?

We're very ambitious, but ambition on its own is not enough to be successful at something, you also need skillfulness and experience. In the last three months we have merged and coordinated 8 internal hires and 25 external ones in order to take care of every aspect of the project the best we could.

There are many, many little details in our project, from our polished website to our viral marketing campaigns, not to forget our remarkable presence, assistance and openness.

Our staff is ready to UNLEASH the marketing phase, which will build up to the presale before the official token launch on June 16th.

We're certain to obtain great results, our token will reach every corner of this planet and tens of thousands of investors will flock to us and join our cause.

We can't promise unrealistics x1000, however we are so confident in our competence, in our carefully planned organization and, above all, our commitment to this project's success that we are meant to soar into the skies like true superheroes!

SUPERH

SuperH Token Benefits

SuperH is a project based on a BEP-20 protocol over Binance Smart Chain, this grants low gas fee on transactions and fast operations.

SuperH smart contract it is BEP-20 Compliant and it is visible clearly on BSC Scan Explorer to the contract address:

SuperH project is based on 6 fundamental following points below:

- 1.** Holders Rewards
- 2.** Automatic Liquidity Pool(LP)
- 3.** Liquidity Pool(LP) Lock for 99 years
- 4.** Manual Burn
- 5.** Charity support
- 6.** Staking rewards holders program

01

Holders Rewards

A common misconception with the heavy APY average is the subjectivity of the impermanent loss from staking an LP (liquidity provider) in a farming reward generator. With the explosion of DeFi we have seen too many new crypto currency prospectors get sucked into a high APY LP-farming trap, feeling hopeless as they are pushed out by earlier buyers with higher staking rewards.

However, almost always the token suffers from the inevitable valuation bubble, which is then followed by the burst and the impending collapse of the price. This is why we have seen the mass adoption of Holders rewards, also known as reflection, a separate concept that seeks to eliminate the troubles caused by farming rewards.

Holders rewards solve many problems. First, the reward amount is conditional upon the volume of the token being traded. This mechanism aims to alleviate some of the downward sell pressure put on the token caused by earlier adopters selling their tokens after farming crazy high APY's. Second, the reflect mechanism encourages holders to hang onto their tokens to garner higher kick-backs which are based upon a percentages carried out and dependent upon the total tokens held by the owner.

02

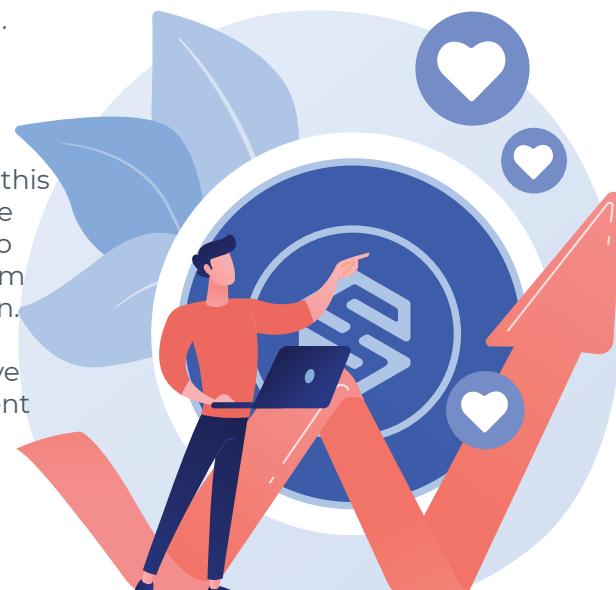

Automatic Liquidity Pool (LP)

Automatic LP is the secret ingredient of SuperH. Here we have a function that acts as a two-fold beneficial implementation for holders. First, the contract sucks up tokens from sellers and buyers alike, and adds them to the LP creating a solid price floor.

The added LP creates a stability from the supplied LP by adding the tax to the overall liquidity of the token, thus increasing the tokens overall LP and supporting the price floor of the token. This is different from the burn function of other reflection tokens which is only beneficial in the short term from the granted reduction of supply.

As the SuperH token LP increases, the price stability mirrors this function with the benefit of a solid price floor for holders. The goal here is to prevent the larger dips when whales decide to sell their tokens later in the game, which keeps the price from fluctuating as much as if there was no automatic LP function.

All of this is an effort to alleviate some of the troubles we have seen with the current DeFi reflection tokens. We are confident that this model and protocol will prevail over the outdated reflection tokens for these reasons

03

Liquidity Pool (LP) Locked for 99 years

SuperH Liquidity Pool will be created on PancakeSwap V2 automatically from Unicrypt website (where presale will take place). Liquidity Pool will be Locked by Unicrypt for 99 years so to grants buyer and seller about permanent liquidity.

04

Manual Burns

Sometimes burns matter; sometimes they don't. A continuous burn on any one protocol can be nice in the early days, however, this means the burn cannot be finite or controlled in any way. Having burns controlled by the team and promoted based on achievements helps to keep the community rewarded and informed. The conditions of the manual burn and the amounts can be advertised and tracked.

SuperH aims to implement a burn strategy that is beneficial and rewarding for those engaged for the long term. Furthermore, the total number of SUPH burned is featured on our readout located on the website which allows for further transparency in identifying the current circulating supply at any given point of time and the hash transaction code of burning event.

05

Charity support

SuperH is a token created to help charity organizations and it does so in a clear and transparent way, 3% of each purchase or sale transaction is loaded into a wallet address that will be published and used as a treasury to charity association selected periodically from SuperH token holders from a list of available charity associations.

**Invest in Super,
and improve the livability of the planet while earning!**

06

Staking rewards holders program

SuperH staking program allows you to easily generate rewards in SUPH by simply holding your SUPH on SuperH website. Staking rewards can be as high as 100% per year and you can unstake your assets whenever you want.

Staking rewards are paid continuously and you can decide to harvest the rewards accumulated and reinvest them again, creating a global compound income.

SuperH Protocol

SuperH employs 3 simple functions:

Reflection + LP acquisition + Charity support,

In each trade the transaction is taxed a 9% fee, which is split 3 ways.

3% fee is redistributed to all existing holders proportional to their holding tokens

3% fee is charged on a liquidity wallet, half token will be sold and the earn BNB and remaining tokens will be used to increase the liquidity pool on Pancake Swap.

3% fee is devolved in charity address and forwarded to the charity association choosen by token holders periodically.
